

Environmental Policy Statement

The management of Digiterm Ltd. declared its commitment – in compliance with the requirements of **EN ISO 14001** standard – toward the continuous development of environmental performance and prevention of pollution.

Environmental aspects

Digiterm determined the environmental impacts of its manufacturing activity and products for which the following aspects were taken into consideration:

- Compliance with all applicable laws, regulations and requirements
- Prevention of pollution
- Conservation of natural resources and minimize waste
- Promotion of environmental improvement throughout our supply chain
- Improvement of working environment
- Establishment of objectives and targets for continuous improvement

EcoDesign

In compliance with the EuP (Energy Using Products) Directive and WEEE, the Packaging Waste Regulations and the Essential Requirements, we aspire to improve the environmental performance of our products, activities and services and minimize their environmental impacts.

Our EcoDesign concept consider the design and lifecycle impacts of Comfort Therapy Chairs and its packaging through its entire lifetime, including:

- Design for long working life, durability
- Improved energy consumption
- Waste minimisation during production
- Optimised size and type of packaging
- Improvement in quality / customer satisfaction
- Prolonged lifetime by increased service efficiency
- Multi-functionality and extended product range
- Reduced environmental impact of disposal
 - ↳ Recycling or recovery of raw materials
 - ↳ Ease of dismantling to aid recycling
 - ↳ Re-use of component parts
 - ↳ Refurbishment of our products for resale

Competence & training

Employees of Digiterm are fully aware of the environmental impacts of their action, and the relating information are supported by regular training programmes to drive progress.
